Introduction <i>by Umberto Bertelè and Andrea Rangone</i>	5
Executive Summary <i>by Alessandro Perego and Paolo Catti</i>	7
1. The benefits of electronic invoicing	13
□ Models of electronic invoicing and integration of order-to-payment cycle	14
□ The benefits and the profitability of electronic invoicing projects	16
□ The four rules of electronic invoicing	20
2. The potential benefits for the National economic system	27
□ The estimate of number of invoices	27
□ The estimate of overall benefits for Italy	28
□ The impact in different sectors	29
□ The estimate of benefits for PAs	30
3. The level of adoption in Italy	33
□ The diffusion of order-to-payment cycle integration models	33
□ The diffusion of models of substitute archiving of invoices	36
□ A future outlook	37
4. The Legislative framework <i>by Allegra Stracuzzi and Umberto Zanini</i>	39
□ The evolution of the Italian Legislative framework	40
□ The evolution of the European Legislative framework	42
□ The regulation of contracts with third parties	43
□ The regulation of EDI exchanges	45
5. Electronic invoicing in Europe	47
□ The diffusion of electronic invoicing	47
□ Collaboration between the players	48
□ The clarity of the Legislative framework	49
□ The considerations for Italy	51
6. Priorities for the diffusion of electronic invoicing	53
□ Potential barriers	53
□ The awareness and commitment of Management	54
□ Integrated management of order-to-payment cycle	56
□ The openness to collaboration	57
□ Clarity and stability of the Legislative framework	58
□ The tools for interoperability	59
A note on methodology	61
The Work Group	63
The School of Management	65
□ The Politecnico di Milano School of Management	65
□ The <i>ICT & Management</i> Observatories	65
□ MIP	66
Our Research Sponsorship	67
